How the Next Evolution of the Internet Is Changing Everything

The Internet of Things (IoT), sometimes referred to as the Internet of Objects, will change everything—including ourselves. This may seem like a bold statement, but consider the impact the Internet already has had on education, communication, business, science, government, and humanity. Clearly, the Internet is one of the most important and powerful creations in all of human history.

How the Internet is Changing Language TranslateMedia

Children are accessing the internet after learning their mother tongue, so internet’s power as a mother tongue is obviously limited in scope. Instead the impact may be that language users adapt more nimbly between the different environments in which they use different forms of language. Whilst Singaporeans might use ‘Singlish’ (a sort of English spoken locally) with each other, they usually switch to standard English when communicating with outsiders.
