Properties of Division Closure Property. The closure property of the division tells that the result of the division of two whole numbers is not always a whole number. Whole numbers are not closed under division i.e.,  $a \div b$  is not always a whole number. From the property, we have,  $14 \div 7 = 2$  (whole number) but  $7 \div 14 = \frac{1}{2}$  (not a whole number).
